Manufacture

The founders of "glabbal" have their roots in Bavaria, so it's hardly surprising that the word "glabbal" also comes from Bavarian dialect. "glabbal" was the original term for wooden slippers, as these make a very distinct and noticeable sound when walking.

"glabbal" combines decades of **experience**, state-of-the-art **technology** and the highest **quality** standards together with the desire to get a perfect orthopaedic sandal. You will be guided by experts from the selection and fitting process right up to the moment you hold your "glabbal" in your hands. When it comes to design, there are no limits to your individuality and taste. Feel free to combine the straps, blanks and outsoles you find on the following pages the way you want. The result will be your very own pair of "glabbal"; always unique!

Have your custom-made pair of sandals made by hand right now at your local "glabbal" maker - because every pair of "glabbal" is a unique piece, tailor-made for your feet.
